About us

Welcome to Mohammad Accessories Ltd. where fashion meets sustainability in every aspects of Life. We are a leading manufacturiing company committed to revolutionizing the industry with our eco-friendly approach to design and product variation. Mohammad Accessories Ltd. was Established in 2013. The company aims to make sustainable products; garments trims and accessories.

At Mohammad Accessories Ltd. we believe that style should not come at the expense of the planet. With a passion for both fashion and environmental responsibility, we have curated a collection of trims and accessories that embody the perfect blend of aesthetics and sustainability.

MISSION

Our mission is to enhance the global fashion industry by offering innovative, high-quality garment accessories that inspire creativity and contribute to exceptional designs. We aim to be the preferred partner for fashion designers, manufacturers, and retailers by consistently delivering products that meet the demands of an ever-evolving market

GOAL

- Expanding our range of products to meet diverse fashion needs.
- Continuously innovating to stay ahead of fashion trends.
- Building strong, lasting relationships with our customers by offering service and value.
- Supporting sustainable practices through eco-friendly materials and production methods.

STRENGTH

Each of our products is crafted with meticulous attention to detail, ensuring they meet the highest standards of quality and style. Whether you are creating, we provide the perfect accessories to enhance your designs.

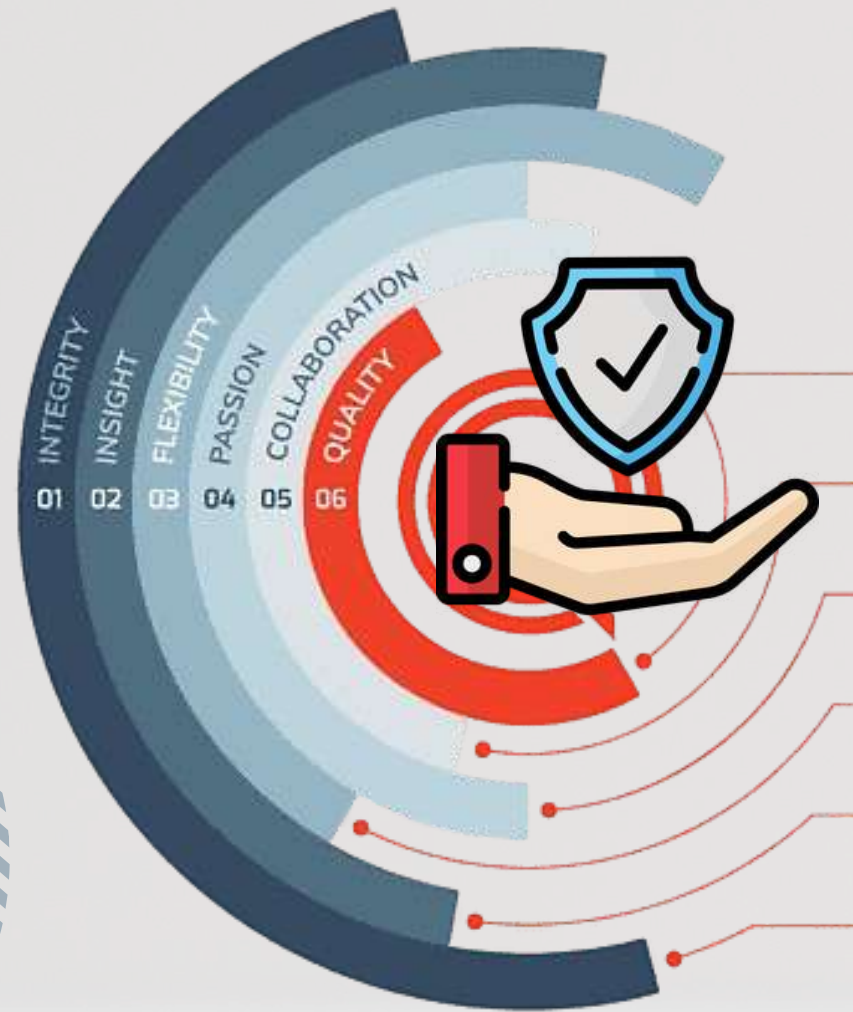

Our Values

Sustainability

We prioritize eco-friendly materials and processes, ensuring that our trims not only enhance the appeal of your garments but also contribute to a healthier planet.

Innovation

Mohammad Accessories Ltd. is at the forefront of innovative product, creating products that not only follow the latest fashion trends but also set new standards for sustainable fashion.

Quality

Each accessory is crafted with precision and attention to detail, reflecting our commitment to delivering products that stand the test of time in both durability and style.

Ethical Practices

We take pride in our ethical business practices, from sourcing materials to manufacturing processes. We strive to create a positive impact on the communities involved in our supply chain.

Packaging Tape

Flexible Packaging

Carton & Paper Items

Mohammad Accessories Ltd. produces a full range of garments paper packaging items including carton boxes, photoboards, backboards, header cards, Shopping bags and paper inserts for export and retail use.

ECO FRIENDLY PACKAGING
REDUCE, REUSE, RECYCLE

**REUSE
REDUCE
RECYCLE**

Global Recycled Standard

Scope Certificate

Recycle Plastics

Global Recycled Standard (GRS) is an internationally recognized certification that verifies recycled content, supply-chain transparency, responsible social and environmental practices, and chemical safety in recycled products. It assures buyers that materials are genuinely recycled and produced under compliant, traceable and sustainable processes.

Mohammad Accessories Ltd. is a licensed GRS manufacturer specializing in recycled plastic polybags for the garments and packaging industries. The company uses certified recycled raw materials and maintains strict quality and compliance standards throughout production. By offering GRS-certified recycled polybags, Mohammad Accessories Ltd. supports brands in reducing virgin plastic use, meeting sustainability goals, and ensuring responsible packaging solutions for global supply chains.

COMPOSTABLE
IN INDUSTRIAL FACILITIES

Check locally, as these do not exist in many communities. Not suitable for backyard composting.

Compostable Solutions

Compostable and Biodegradable plastics are eco-friendly materials designed to break down naturally through microbial activity into water, carbon dioxide and biomass without leaving harmful residues. These plastics are developed from certified compostable resins and are tested under international standards to ensure safe decomposition in industrial or controlled composting environments. They provide similar strength, flexibility and performance to conventional plastic while offering a more sustainable end-of-life solution.

100% **COMPOSTABLE**
CERTIFIED

Mohammad Accessories Ltd. manufactures biodegradable and compostable polybags for the garments and export industries, supporting brands that aim to reduce environmental impact and comply with global sustainability requirements. Through responsible sourcing and quality-controlled production, the company delivers packaging solutions that help minimize plastic waste and promote circular, environmentally responsible practices.

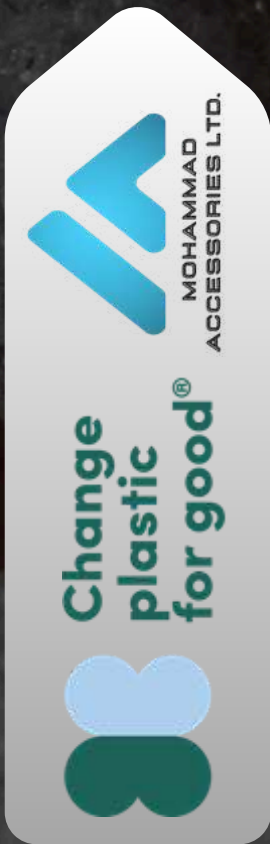

Biodegradable Plastics

Licensee & Manufacturing Partner

BDP® biotechnology

An organic ingredient for plastic that makes it irresistible to microbes.

Mohammad Accessories Ltd. is a licensed manufacturer of Change Plastic for Good-BDP polybags. By producing BDP-enabled recycled and virgin plastic polybags for the garments and export industries which helps global brands reduce long-term plastic pollution, improve sustainability, compliance and transition toward more responsible biodegradable packaging solutions.

Does it cause Microplastics?

No!

Microbes are hungry and they don't leave food behind... and we have proof!

How is it added to Plastic?

Super easily!

BDP® is a drop in polymer, added to the manufacturing process of products in the same way that colorant is added.

Is it Recyclable?

Yes!

BDP® treated plastics are completely recyclable and should always be recycled.

What is it?

It's not magic!
BDP® is an organic ingredient that is added to plastic during manufacturing.

What is it Great?

An amazing solution.
Plastic can take centuries to decompose. BDP® helps reduce this to a few years.

How does it work?

All the details.
BDP® attracts bacteria in landfill, soil and in oceans, allowing them to consume plastic.

A Biotechnology to Change the Game

Water Soluble Plastics

Hydropol™, a patented, high-performance and sustainable polymer used mainly for packaging and hygiene products. Hydropol is a water-soluble, recyclable, compostable and biodegradable material designed to replace conventional plastics while maintaining strength and barrier performance. It dissolves safely in water and can biodegrade into water, CO₂ and biomass helping reduce plastic waste and improve recyclability.

Easier Recycling

No Harmful Microplastics

Compostable

Marine-Safe

Water Soluble

Anaerobic Digestion

Hydropol is supplied as resin pellets that can be processed on standard packaging machinery to create films, laminates, paper coatings and nonwoven materials. It is used for applications such as food and snack packaging, garment and laundry bags, wet wipes, hygiene products and other flexible packaging where environmentally safe end-of-life options are required.

PLASTIC SOLUTIONS

Our facility is equipped with advanced machinery sourced globally-

- **Blowing Machines – 20 Units (Japan, Taiwan)**
- **Printing Machines – 7 Units (Taiwan, China)**
- **Bag-on-Roll Machines – 4 Units (China)**
- **Recycling Machines – 2 Units (Japan)**
- **Cutting, Folding, Mixing, Sealing & Auxiliary Machines – 28 Units (Europe & Asia)**

Existing Machineries

| Product Type | Capacity/Day | Capacity/Month |
|--------------------|--------------|----------------|
| Side Sealing Bags | 500,000 Pcs | 13,000,000 Pcs |
| Ziplock Bags | 50,000 Pcs | 1,300,000 Pcs |
| Bottom Sealed Bags | 300,000 Pcs | 7,800,000 Pcs |
| Other Bags | 20,000 Pcs | 520,000 Pcs |

Production Capacity

Incorporated in 2013, Mohammad Accessories Ltd. has been involved in the plastic packaging sector since the industry's inception and continues to expand and grow as one of the export-oriented manufacturers of plastic packaging. To date, Mohammad Accessories Ltd. has amassed more than 74 units of machines, each housed within our factories covering more than 35,000 square feet of space. This in turn, allows for a production capacity of approximately 4,500 metric tons per annul.

Source of Raw Materials

Quality of the products is the most important factor. The products we buy are for higher quality and better valued products. To match the highest level of quality, all raw materials such as HDPE/LDPE/LLDPE/PP/Masterbatches and others are imported directly from SAUDI ARABIA/Singapore/Taiwan/ Malaysia,UAE to maintain the consistent quality even for betterment of the quality of products. We are introducing much more sophisticated and advanced technology. The raw materials we use are all FDA certified

Achievement Milestones

Global Reach

Exported to 25+ countries including USA, UK and EU markets meeting all international compliance and quality standards

Annual Capacity

Expanding to 6,000MT per year, positioning Multimax among the top manufacturer in the flexible packaging sector.

Sales Milestone

Surplus USD 9.8 Million in annual turnover in 2019 under current leadership

Innovation

Introduced Eco friendly packaging technology using D2W, EPI and CPFG materials tailored to clients needs.

Sustainability

Among the first in Bangladesh to produce bio degradable and oxo-degradable plastic packaging

Trusted By Global Brands

Partnered with Amazon, Carrefour , H&M and YKK Bangladesh maintaining long term supply relationship

Why?

Quality First

We are committed to delivering products that are durable, stylish, and functional.

Just in Time Delivery

We prioritize personalized service, ensuring that every order meets our clients' specific needs.

Trend-Driven Innovation

Our team constantly researches and adapts to fashion trends, ensuring we offer the latest in accessory design.

Sustainability Focus

We strive to incorporate sustainable practices by offering eco-friendly materials and minimizing waste in production.
